EXPERIENCE & PROJECTS

Taglio S.R.L | Net, C#, Blazor, Python

Senior Software Engineer | Jun 2024 - Present | Piobesi D'Alba, Italy

Backend Developer & API Specialist

- Leading the incremental migration of a legacy .NET codebase to a new API layer across 15 in-production products, replacing inventory, design-workflow, and machine-control modules **one module at a time with no downtime as the live client base grows.**
- Designed and shipped **60+ REST & GraphQL APIs** from scratch (and still growing) for inventory, production, and machine integration, with versioned contracts, consistent error handling, and stable response times under production load.
- Introduced unit and integration testing and CI to a codebase with no prior coverage. Used **AI coding assistants** to generate the bulk of test suites and flag code-quality and best-practice issues, reviewing and correcting AI output before merge rather than accepting it as-is.

Cluster Reply S.R.L | Azure, .NET, C#, Kubernetes, AngularJS

Software Engineer | Apr 2021 - May 2024 | Turin, Italy

Technical Lead

- Led development of IoT diagnostic machines serving up to **500 concurrent users** with Azure cloud services, designing the telemetry ingestion pipeline, Kubernetes microservice layout, and AngularJS dashboards for field engineers; sustained 99.9% uptime against the platform's Azure SLA.
- Directed a sub-team of 3 within an 8-engineer platform group: split work by module, defined service interfaces upfront, and ran code reviews focused on testability and clear architecture boundaries.
- Owned a 500 GB data migration from the previous provider to Azure whose source connection dropped at random: designed an **idempotent, checkpointed transfer** – deduplication keys plus resumable batches on Azure Durable Functions – so retries **neither duplicated records nor restarted from zero.**

Consultant

- Built Azure IoT ingestion for **1,000+ connected devices** and profiled the hot path to **cut per-message processing cost and latency.**

Summer Camp Manager | Team Work, People Management

Manager | Jul 2020 - Sept 2020 | Guarene, Italy

- Managed **40 staff members** for **100 children (aged 3-13)**, achieving **98% parent satisfaction rate** and **zero safety incidents** under COVID-19 safety protocols.

Automatic Classification of Software Issue Report

Master's Thesis | Apr 2020 - Oct 2020 | Turin, Italy

- Collaborated with Mozilla development team to create an automated bug classification system, **improving classification accuracy from 70% to 92%**
- Manually classified **250+ software bugs**, creating a training dataset that **reduced manual classification time by 80%.**
- Built a machine learning classifier reaching **92% precision and 89% recall** on the held-out set.

Shared Editor Project

Master's Projects | May 2020 - Oct 2020 | Turin, Italy

- Designed and programmed a shared text editor in C++ with the Qt framework, handling **real-time collaboration and conflict resolution** across multiple concurrent users.
- Built and trained Generative Adversarial Networks for image generation and classical ML models (**SVM, decision trees, CNNs**) across coursework projects.
- Applied machine learning techniques to bioinformatics problems.

EDUCATION

Polytechnic University of Turin (PoliT0)

M.S., Computer Engineering

Oct 2020 | Turin, Italy

Grade: **110 cum laude/110**

Top 5% of graduating class

B.S., Computer Engineering

Jul 2018 | Turin, Italy

Grade: **110/110**

Top 10% of graduating class

Exchange Program

Mississippi State

University

Aug | Dec 2017 | Mississippi, USA

Grade (GPA): **A (4/4)**

Top 5% in the class

SKILLS

Backend Development

C#•.NET•Python•SQL•KQL•REST
•GraphQL•C•C++•Java

Miscellaneous

AI•MachineLearning•Azure•Kub
ernetes•Docker

Frontend Development

AngularJS•Blazor•HTML•CSS

Soft Skills

Public speaking•Scrum development•Technical Writing

Languages

Italian (native)•English (fluent, IELTS: 7.5)

COURSEWORK

Data Structure and Algorithms

Data Science

Machine Learning & AI

Database Technologies

Distributed Programming

Big Data

Data Comm. Networks

Operating Systems

EXTRACURRICULARS

INTERESTS

7 summers as summer camp organizer serving 700+ children annually with consistently high satisfaction ratings (95%+)

Active IEEE-HKN member

(PoliT0 Mu-Nu Chapter)

Traveling, Soccer, Running, Fitness
